N.V. AMPS Drone Services

Female-led

ABOUT

N.V. AMPS Drone Services is a Surinamese company that offers professional industrial drone solutions for businesses and organizations. We provide Drone-as-a-Service and turnkey drone services for collecting, processing, and analyzing aerial data. Our services include, among others, industrial inspections, powerline and switchyard inspections using RGB, thermal, LiDAR, and corona technology, drone mapping, photogrammetry, LiDAR surveys, 3D modeling, land surveys, volume calculations, infrastructure inspections, security & surveillance, agricultural applications, emergency response, waste management, bathymetric surveys, and underwater inspections with ROVs. Our solutions are deployed in sectors such as mining, energy & utilities, oil & gas, construction, infrastructure, agriculture, water services, and industrial installations. Using drones, sensors, and specialized software, we help clients collect reliable data faster, more safely, and more cost-efficiently, inspect hard-to-reach or high-risk locations, plan maintenance better, and make operational decisions based on accurate reports, orthomosaics, point clouds, digital terrain models, and 3D models. AMPS Drone Services works with trained and certified pilots and follows quality- and safety-focused work processes.
