EQUIPMENT SERVICING

Flux Electrical Engineering NV

ABOUT

The company is a technical engineering and consultancy firm focused on advising, designing, developing and executing projects in areas including sustainable energy and electrical engineering. In addition, the company engages in feasibility studies, project management, research and development, and guiding organizations and projects in both the public and private sectors, nationally and internationally. The company also carries out technical installations and works itself, such as low-, medium- and high-voltage installations, security, automation and sustainable energy systems. Furthermore, its activities include trading in technical products, import/export, logistics, and acting as an agent or representative.
