ICT SERVICES

Unified Bizness Tech

Female-led

ABOUT

Implementation and support of business software, including CRM, accounting, HR, helpdesk, project management and workflow solutions based on the Zoho platform. We assist companies with analysis, setup, automation, training and support of these systems. - Cloud-based payroll and time-registration integrations via our own platform "Paysinc", which automatically links attendance data from time clocks and biometric systems to payroll software and HR processes. - Supply, installation and support of biometric time-registration and access-control systems from providers including FingerTec and TimeTec Cloud. This includes face recognition, fingerprint, RFID and cloud solutions for personnel management and security. - Cybersecurity and endpoint protection solutions, including antivirus, network and ransomware protection via Bitdefender solutions. - IT infrastructure services such as network management, WiFi solutions, server support, cloud services, backup solutions and general IT support for businesses. - Web development, website management and digital branding services, including maintenance of business websites, online portals and integrations with business software. - Consultancy and automation advice aimed at optimizing business processes, digitalizing administrative workflows and integrating various systems within organizations.
