Invictus Technical Solutions

Female-led

ABOUT

Invictus Technical Solutions positions itself as a provider of complete technical solutions for homes, businesses, shops, offices, warehouses, and industrial locations. The company not only supplies products, but also handles installation, configuration, maintenance service, and after-care. Our focus is on quality, reliability, and professional finishing. Core activities:
1. Security cameras (CCTV). We supply and install custom camera surveillance systems, covering: Home security, Retail and business security, Warehouses and storage locations, Grounds and premises, Office environments. The service includes: Advice on camera placement, Supply of cameras and accessories, Installation and configuration, DVR and NVR storage systems, Cloud storage options, Maintenance and fault-repair service, After-care and expansion of existing systems. For new construction or renovation, we can integrate the cabling and infrastructure into the building process in advance.
2. Alarm systems. Invictus supplies complete alarm systems for homes and businesses. Our work consists of: Risk analysis, Advice on detectors and sensors, Placement of alarm control panels, Configuration of security zones, Professional installation, Periodic maintenance, Technical support. The goal is to offer a reliable security solution that is easy to use.
3. Air conditioning. The company supplies and installs air conditioning systems from 9,000 BTU to 60,000 BTU. This includes: Split units, Multi-split systems, Industrial air conditioning solutions, Maintenance and cleaning, Refrigerant and performance checks, Repairs and service. Customers receive advice on the correct capacity and placement to achieve maximum efficiency and comfort.
